THE NEWS ABOUT TOWN

ITEMS OF INTEREST PICKED UP BY THE NEWS MAN.

The hay-pressers are at Herman Mason's.

Mr. T. J. Foster has been very ill since Monday.

Miss Lena Briggs visited her home in Harrison Sunday.

Mrs. C. H. Harvey is in Brunswick and Lewiston, this week.

Don't forget the ice cream sale to-morrow night at the library.

Miss Sadie Woodbury of Portland, is a guest at Mr. E. A. Capen's.

Mr. and Mrs. H. H. Bean went to Rumford, Monday, to visit relatives.

Miss Ethel Thompson of Auburn, is visiting Dr. and Mrs. Sturdivant.

Mrs. E. N. Anderson of South Paris, visited at H. A. Packard's, last week.

Mrs. Mary Jordan of Locke Mills, is with her grand-daughter Miss Lulu Bryant.

Mr. H. A. Packard has been appointed police officer of the village corporation.

Mrs. Jackson who has been the guest of Mrs. Will Abbott, has returned to her home.

The Ladies' Club will meet with Mrs. Edmund Holt, Thursday afternoon, at three o'clock.

Mr. Fred P. Chandler and family of South Paris, visited Mrs. Chandler's parents, Sunday.

Mrs. Emma Lord of Old Orchard, was the guest of Mr. and Mrs. Seth Walker, last Sunday.

Mr. John Laughlin who has been ill for several days, has gone to the hospital for treatment.

Mr. and Mrs. Will Lowe and daughter Gertie have gone to Nova Scotia for two months.

Nice ripe strawberries and good, rich cream at the library, to-morrow evening. Will meet you there.

Mrs. A. G. Wiley and daughter are visiting at the home of Mrs. Wiley's sister, Mrs. F. L. Edwards.

Mr. and Mrs. R. E. L. Farwell were guests of his brother, A. C. Farwell at York Beach a part of last week.

Miss Alice Capen went to China Saturday morning, to spend a few weeks with her sister, Mrs. Fred Roberts.

Widd Twaddle came up from Brunswick, the last of the week, where he is a student at the Maine Medical College.

Ice cream for sale, also strawberries and cream at the Bethel Library to-morrow evening. A liberal patronage is desired.

Mr. and Mrs. Fred I. Farwell who came to Bethel for their wedding trip, returned to Somerville, Mass., the first of the week.

The Ladies' Church Aid will meet with Mrs. R. E. L. Farwell, Thursday afternoon, June 22. A full attendance is desired.

Mr. Arthur Bunting and family returned to Groveton, N. H., this morning, after a few days spent in Bethel and Portland.

Miss Mildred Shaw who has had an operation for appendicitis has returned from the hospital very much improved in health.

The Children's Day exercises at the M. E. church will be held next Sunday morning at the hour of the usual preaching service.

D. H. Mason is attending the Bowdoin College Commencement as the guest of Edwin Harvey, a member of the class of 1905.

The ladies of the M. E. Society will sell ice cream and cake on the church lawn, Saturday evening, June 24, if the weather is suitable.

Mrs. Clara Champion who has been with Mr. Peaslee of Upton, caring for his little son for the past year, visited her sister, Mrs. M. F. Coolidge, last week, and has gone to Boston for a few weeks.

Gilbert Tuell came home from Bowdoin College last week.

Mr. A. F. Copeland has been at Rumford Falls on business, this week.

Mrs. Ellen Chase and daughter Grace of Portland, are guests at The Howard.

O. H. Sawtelle of Lewiston, spent Sunday with his daughter, Mrs. J. F. Coolidge.

Mr. and Mrs. Fred Clark and Mrs. Amanda Kendall were in Gorham, N. H., Sunday.

The Festival Chorus rehearsals will be discontinued until the first Wednesday evening of August.

Mrs. Frank D. Kennedy and little son Delmont of Auburn, are the guests of Mr. and Mrs. L. E. Bates this week.

Mr. Josiah Dutton has returned from the Central Maine General Hospital Lewiston, where he has been for treatment.

Miss E. Florence Hutchinson who has been to the Maine Central Hospital, Lewiston, for treatment, returned, last week.

Mrs. Harold Chapman and son Ruel of Auburn, spent Sunday with Mrs. Chapman's parents, Mr. and Mrs. W. D. Hastings.

A chorus of young voices will be heard at the Universalist church, next Sunday forenoon. All members of the Sunday school are requested to be present as arrangements must be made for Children's Day exercises.

The Bethel Library Association will sell ice cream and cake, also strawberries and cream at the library and on the grounds, to-morrow evening. Let everyone come, get their money's worth and help the library.

Bethel ladies will be pleased to learn that Edw. King has put in a stock of Ladies' Home Journal patterns. He has a large stock constantly on hand, and respectfully invites the attention of the ladies to the same.

Mrs. Fannie Bisbee has sold the house near the station to Mr. Winslow which will be occupied by the engineer of the chair factory, Mr. Frank Heath, and Mr. Bartlett will exchange rents and move into the Chapman house on High street.

Mr. and Mrs. F. L. Edwards went to Portland Monday morning, where they met Mr. A. M. Edwards and son Sumner of Syracuse N. Y., with whom they went to Brunswick to attend the Bowdoin College Class Day exercises yesterday.

The following board of officers were elected for the ensuing year by the Gould's Academy Alumni Association at the adjourned meeting held at the office of H. H. Hastings, Esq., Saturday afternoon, June 17:

President—H. H. Hastings, Esq.
Vice President—H. C. Rowe.
Secretary—Miss Annie M. Frye.
Treasurer—Mrs. O. M. Mason.

Executive Committee—Mrs. Joan Stearns Kilborn, Mrs. G. R. Wiley, Mr. Algernon S. Chapman.

Mr. Fred B. Merrill has completed his course at the Harvard Law School and returned to his home in Bethel. Mr. Merrill has entered the office of Herrick & Park where he will remain. He will assist in the general law business of the firm and also in the bank work. Miss E. E. Burnham will continue in the employ of Messrs. Herrick & Park but will give her attention largely to the clerical work of the Savings Bank and general book-keeping. With this force the firm is in a position to conduct its business carefully and expeditiously and to give to the increasing bank business the pains-taking attention which it requires.

Letters for the following are advertised at the postoffice:

Nettie Coolidge.
Mrs. Annett Coolidge.
Mrs. M. L. Strickland.
O. H. Holt.

Wanted.
A girl to do general housework. Apply to

DR. G. L. STURDIVANT,
375 Bethel, Maine.

BUSINESS POINTERS.

Business Readers will be published in this column at eight cents per line, reckoning even words to the line.

I saw it among the Business Pointers.

5 and 10 cent counter, at King's, many bargains.

Lisle Gloves, good colors and style for 10 cents at Miss Stearns.

See the Souvenir Stationary at King's, four Bethel Views in a box, 25 cents.

Silk Mitts for 15 cents at Miss Stearns.

Wood Baskets, 38 cents, was 75 cents at King's only a few left.

Basket sale at King's. Just half price.

Drowning Accident.

It was an extremely sad accident by which two young men of the city of Vancouver, lost their lives Wednesday afternoon, June 7, on the Squamish river. The victims are Arthur Fulk, the 17-year-old son of Mr. and Mrs. Owen Fulk of Vancouver, and a young man named Algar Kilgore, 19-year-old son of Mr. L. W. Kilgore of North Newry, Maine.

The details of the accident show that at the time it occurred young Fulk was standing out on a boom that was being made up in a slough off the river, when he slipped and fell off the logs into the water. Kilgore was on the bank, and on seeing his friend fall in the water jumped in and struck bravely out to assist him.

That was the last seen of either, and it is thought that possibly in their struggles to get back on the boom, both must have gone to the bottom. The water was only about ten feet deep, and not very cold and it was not a difficult matter to bring the bodies up and place them on the shore.

The remains of Fulk were sent to Burlington, Wash. the funeral of Kilgore took place Friday afternoon conducted by friends. The large crowd of sympathizers present testified to the universal admiration of the brave deed which cost the deceased his life. His parents who live in Newry were wired Thursday.

Temagami.

Nimrod was a mighty hunter, but had he hunted in the "Temagami" region he would have been a mightier one. Nimrod hunted for glory, but Temagamians hunt for game. Those Indians who made the first canoe of birch bark long ago, were our greatest benefactors. The children of these Indians know the canoe, and they know how to use it, and if you go to Temagami this summer they will paddle your canoe in their own superb way. They will be the best guides you ever had, and they will take you through rivers, lakes, forests and hunting grounds their forefathers once called home, they will tell you of the tricks and habits of the bears, beavers, moose, caribou and deer. Ah! the Indians know, for once they were mightier hunters than ancient Nimrod. Students who camp in summer along the Temagami lakes are able to do two years work in one. Business men who camp under the Temagami skies never stop at the hospital or go into bankruptcy. Easy of access by the Grand Trunk Railway System. For information address, J. Quinlan, D. P. A., G. T. Ry., Montreal.

East Oxford C. E. Union.

The East Oxford C. E. Union will hold its semi-annual meeting at Andover, June 27. The opening service will be at 10.30 a. m. A strong program has been arranged and a helpful session is assured.

A Call.

Let us think of the dead and show that we do. I wish to see the old and what might be beautiful burying ground put in shape. There are many old landmarks there that should be respected. Let us all meet at the Hose house Saturday evening to make arrangements.

GEO. W. FERNALD.

BASKETS.

My supply of Baskets is low and some of them are slightly damaged. These I wish to clean out before putting in complete new stock. So shall for next week, commencing Thursday, June 22, sell any and all at

JUST HALF PRICE

Or even less for some of them. Wood Baskets, Work Baskets, Lunch Baskets, Waste Baskets, Sweet Grass Baskets, Fancy Baskets. Remember Sale is for one week unless sooner sold out. They ought to all go in three days.

ROADS AND ROAD MAKING.

ADVANTAGES OF GOOD ROADS.

Journal of Agriculture Gives Good Reasons to Farmer.

(1) Economize time and force in transportation between farm and market;

(2) Enable the farmer to take advantage of market fluctuations in buying and selling;

(3) Permit transportation of farm products and purchased commodities during times of comparative leisure;

(4) Reduce the wear and tear on horses, harness, and vehicles;

(5) Enhance the market value of real estate.

But while it is easy to enumerate the ways in which improved roads will be financially advantageous to farmers, it is very difficult to estimate in dollars and cents, the benefits to accrue therefrom.

Causes For Repairing Roads.

(1) Defective construction of earth bed.

(2) Failure to cut off underground water by drainage.

(3) Rain or storm water which is permitted to lie in pools along the roadsides or in side ditches which do not carry the water from the road.

(4) The side slope being insufficient to carry the storm water from the road to the side ditches.

(5) The longitudinal grade of the road being greater than the slope from center to sides.

(6) The formation of ruts.

(7) Raveling, or picking up loose stones.

(8) Surface stone not of proper quality and not uniform.

(9) Roadbed not sufficiently compacted.

(10) Accumulation of trash on the road.

In Favor of Narrowing Roads.

The sentiment in favor of the reduction of the width of highways from 60 to 40 feet appears to be becoming quite general. Petitions from land owners in the different states, we learn are being made to the highway commissioners to this effect.

The claim made is that too much land is allowed to grow up to weeds by having the road so wide, as the extra ten feet could be well utilized if taken into the farm. It is claimed, also, that by narrowing the legal width of highway a better road can be built and more easily kept in condition.

Good Roads Magazine.

Effects of Cold Rain on Cows.

Recently the Arizona experiment station recorded the results of a cold rain on the milk flow of the station herd. The cows were exposed three days and during that time they decreased thirty-seven per cent in milk yield and continued until it reached fifty per cent. A month passed before they gave as much milk as that before the storm. Any one can therefore readily see that a shelter would soon pay for itself if the herd is usually well up in production.

Post Protection.

Concrete is finding an important new application as a setting for posts, both wood and iron, says Indiana Farmer. When the wooden post is treated with tar and the hole around it is filled with well-tamped concrete, a cheap and practicable indestructible foundation is secured; and similar bedding gives to iron posts for telephone lines and other purposes the stability hitherto lacking. The concrete protects the iron from rust, as it does the wood from rot.

Good Roads in Texas.

One of the effects of the good roads movement in Texas, says Good Roads Magazine, is the establishment of an automobile mail route between San Antonio and Pleasanton, a distance of about 35 miles. Before improvement the road was an almost impassable stretch of ruts, with stretches of deep sand. It is reported that the distance can be covered with an automobile in about three hours.

False Economy.

To let a straw stack stand in a field to rot down to be afterwards hauled on the thin places in that field scarcely pays for the labor expended in hauling and the loss of the encumbered ground. A load of straw will not make a load of manure by a whole lot. After evaporation has taken place in a load of strawstack manure there is not much of it but fiber.

Practical Hints.

Plants have life the same as animals, and they require feeding, watering and care, if we expect to derive profit from them.

The object of the orchard is to produce fruit. The amount and kind of tillage will vary according to conditions; soil, plant food, etc. Study the individual needs of each orchard.—Farmer's Voice.

How to Train Trees.

Whether to train the tree high or low depends upon several conditions. To prune a tree properly means to begin when young and prune annually. This done, there is no occasion of cutting off large limbs, which endangers the life of the tree.—Farmer's Voice.

Oregon Road Association.

The Lane county, Oregon, Good Roads Association at a recent meeting passed resolutions in favor of placing the construction and maintenance of public roads in the hands of a competent road engineer.

Easy Pill

Easy to take and easy to act is that famous little pill DeWitt's Little Early Risers. This is due to the fact that they tonic the liver instead of purging it. They never gripe nor sicken, not even the most delicate lady, and yet they are so certain in results that no one who uses them is disappointed. They cure torpid liver, constipation, biliousness, jaundice, headache, malaria and ward off pneumonia and fevers.

PREPARED ONLY BY

Don't Forget the Name.

Early Risers

For Sale by G. R. Wiley Bethel, Me.

Boy Cigarette-Smokers.

Significant but not surprising results followed an inquiry, recently made into the type of a boy who smokes cigarettes. A record of twenty boys in school who did not smoke and twenty who did was kept for a long period. It was found that of the cigarette smokers nineteen were older than the average in their grade. Sixteen had bad manners, the deportment of eighteen and the physical condition of twelve were poor, fourteen were in bad moral and eighteen in bad mental condition; sixteen were street loafers, and nineteen failed of promotion. Of the non-smokers none were street loafers, only two failed of promotion, and in all the other mentioned particulars the record showed no more than two who could be classed with the smokers. Street loafing, bad manners, poor scholarship and cigarette smoking seemed to go together.

Quality vs. Quantity.

Hard muscles and strong body do not depend on the quantity of food you eat, but on its perfect digestion and proper assimilation. When you take Kodol Dyspepsia Cure your system gets all the nourishment out of all the food you eat. It digests what you eat regardless of the condition of the stomach and conveys the nutrient properties to the blood and tissues. This builds up and strengthens the entire system, overcomes and cures indigestion, Dyspepsia, Belching, Sour Stomach, etc. Kodol Dyspepsia Cure for what is sometimes called America's national disease—Dyspepsia—is destined to eventually work a wonderful and lasting benefit to sufferers from this distressing and mind harassing condition. Sold by G. R. Wiley.

The reckless users of firearms are

getting to be uncomfortably numerous in this State. Sunday a woman in Hampden had a very narrow escape—two narrow escapes in fact—from death. Mrs. Jennie Dickerson was gathering wild flowers for her husband's grave in a pasture near her home when she was startled by the report of a gun and the whistling of the bullet over her head. Standing upright to see from whence it came another bullet struck her hat, knocking it off her head. She fainted, and remained in an unconscious state for nearly an hour. When she recovered she reached her home only with the greatest difficulty, and it will be some time before she recovers fully from the shock to her nerves.—Press.

A Bad Scare.

Some day you will get a bad scare when you feel a pain in your bowels, and fear appendicitis. Safety lies in Dr. King's New Life Pills, a sure cure, for all bowel and stomach diseases, such as headache, biliousness, costiveness, etc. Guaranteed at all druggists, only 25c. Try them. B.

A buffalo bull was recently killed

in the West, as its owner thought it unsafe. It brought him almost \$1000. He received \$600 for the head, \$300 for the hide, and 50 cents a pound for the meat. Thirty years ago buffalo were worth \$1 apiece in the same town.

"So their engagement is broken?"

"Yes they were both too shy to get married."

"What?"

"Well, you see, he was shy of money, and she got shy of him when she found it out."

LIVE STOCK

FEEDING OF SHEEP.

Lambs Raised on Cow's Milk Thrive

Never feed timothy hay where it can be helped; it is too dry, coarse and woody for sheep, says Farmer's Voice. Besides, the heads of timothy tend to collect in the wool about the neck of the sheep, spoiling the fleece to some extent for sale purposes. Be sparing of such grains as corn, barley, rye or oil meal in excess. These grains are too fattening; besides, they tend to cause sheep to lose their wool before shearing time.

"Two or three weeks before lambing time increase the grain ration to about three-quarters of a pound in order to encourage a large milk flow. Feed lightly on grain for two or three days after lambing. Never under any circumstances let a ewe lamb in among the flock. When this is permitted and twins are born, the first born wanders away and becomes mixed with the flock before the mother has had a chance to own it, and the chances are that later she will refuse to have anything to do with it.

"Sheep that have abundance of wool about the udder should be trimmed so that the lamb will have no difficulty in finding the teat. Do not trim so much as to expose the udder unnecessarily and run the chance of having the sheep take cold. Lambs can be raised by hand upon cow's milk. Feed every 2 or 3 hours at first until the lamb is a few days old. The secret of raising lambs by hand is in feeding often and only a small quantity at a time. Of course, see that the milk is heated to the proper temperature—about 32 degrees Fahrenheit.

Cross-Breeding.

The danger in cross-breeding animals is pretty well known, and yet a good many persons venture on such breeding. In a recent discussion on the subject at the American Breeders association meeting, Prof. Castle, of Harvard University uttered the following warnings:

"Cross-breeding is a two-edged sword which must be handled carefully.

"If modification of characters is desirable at the same time as new combinations, then cross-breeding becomes doubly advantageous.

"Since cross-breeding is likely to modify characters, and even when these conform to the laws of alternative inheritance, and is certain to modify them when they give blended inheritance, it should be practiced with extreme caution, and only by the breeder who has a definite end in view and a fairly clear idea of how he is going to attain it."

A New Fatal Disease.

A new disease has fastened its death grip upon horses around Stockton, California, which has characteristics of its own but is yet to be named. The first cases noticed occurred in Stockton and since then horses all over the adjacent country have fallen victims to the deadly malady. The immediate effect is paralysis of the throat. When the animal first feels the clutches of the sickness a slight discharge occurs from the head, similar to ordinary distemper. The next condition is that of paralysis of the vocal chords and the epiglottis. It soon becomes impossible for the horse to breathe and it literally chokes to death. A peculiar thing about the affliction is that there is no swelling in the neck or throat. In fact, the throat is inclined to waste away.

Scours in Calves.

One of the greatest difficulties to overcome is scours in the early calves. Some remedy should always be kept on hand to head off this trouble. It is quite easy to prepare a castor oil emulsion for this purpose, containing a small quantity of pepsin, giving a teaspoonful every day. Should the scour become chronic more powerful astringents are required, which if given judiciously, will aggravate the disease they are given to cure: Prepare chalk, one ounce; powdered catechu, one ounce; powdered ginger, one ounce; peppermint water, one pint. Give two to four teaspoonfuls night and morning. Fresh burnt and powdered charcoal is also another remedy and we cannot do better than to recommend to give very young calves a wineglass full of lime water with the milk, when hand feeding.—Field and Farm.

Silage as Feed.

A feeding test of the Kansas Experiment Station in feeding steers it was found at the end of the 182 days feeding that the steers fed on silage had made an average gain of 446.8 pounds, while the other steers made an average gain of 417.9 pounds. The gain required to produce a hundred pound gain upon the silage fed steers was 715 pounds, while others required 733 pounds.

Lettuce Growing.

Considerable profit may be realized from growing lettuce for a nearby market when one can produce solid heads of a large size. If the location is near a small town it will hardly pay to give much more space to lettuce than is required to produce enough for home use. The Giant Glacier is one of the most promising of the newer sorts I have tested.

Most flockmasters consider that their profit must come from the lambs and that the wool should cover all expenses. It is therefore highly recommended to have everything in readiness for the lambing season.

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of

and has been made under his personal supervision since its infancy.

Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher.

The Kind You Have Always Bought

In Use For Over 30 Years.

THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY.

Design for a Poultry House.

The sill may be a 2 by 6 or 2 by 8 scantling, laid flat on the wall or foundation; a 2 by 2 strip is nailed at the outer edge to give the size of the space between the boards which constitute the side walls. A 2 by 3 scantling set edgewise forms the plate, and to this the boards of the side walls are nailed. These boards may be of rough lumber if economy in building is desired. If so, the inner boarding should be nailed on first and covered with tarred building paper on the side that will come within the hollow wall when the building is completed. This building paper is to be held in place with laths or strips of thin boards.

That Explained It.

The old colored man, at his gate with a crutch under his arm, had sent a boy of his color, about 10 years old to the postoffice for mail and the lad had returned empty-handed.

"I don't see how dat kin be," mused the old man, "You inquired for Moses Whitebeck, dat yo'?"

"Yep."

"And did de postmaster dun look or only shake his head?"

"He dun looked."

"And he said der wah no letters or papers?"

"Dat's what he said, uncle."

"Wall I can't make it out. Did yo' call me Moses or Moses?"

"Moses, I reckon, but it might have been Moses."

"Huh, but dat 'splains it clear as mud," exclaimed the old man. "When I hain't sendin' to de post office fur mail I'm Moses or Moses, but when I'm 'spectin' letters I'm Mr. Worthington Johnson, Esq., and you dun order know it. Yo' didn't get any letters. Now, den, young man, yo' git right down dar an' sagatate de mistake wid such an egotistical circumspection dat he'll know who I am and send me up dem leben or fo'teen letters waitin' for me. Shoo! When anybody expects dat a boy 10 years old has got a delishun in his head he suah to git combusted."

—Minneapolis Tribune.

Took His Word.

There was once in New York an Irish tailor whose eccentricities threatened to bring trouble for him, but whose wit always saved him. One morning a Mrs. Murphy came into his shop and found him working laboriously with a pencil and a piece of paper. She asked him what he was doing and he replied that he was making out a list of the men on the block whom he could whip. "Is Murphy's name there?" inquired Murphy's wife. The tailor confessed that Murphy's name headed the list. When Mrs. Murphy heard of this she came to the shop with a look of indignation. "You little grasshopper," said Murphy, "I could commit suicide on yez wid me little finger. I could wipe up de fur wid yez wid me hands tied. 'Are ye sure about that?' asked the tailor. "Sure I'm sure about it," "Well, then," sighed the knight of the shears, regretfully, "I'll scratch ye all de list."

Definition.

An Englishman was asking for information about the state of education in an Irish county.

"Can they all read and write?"

"Troth they can, every mother's son of them."

"Have you no ignoramuses amongst you?"

"Niver a one."

"Do you know the meaning of the word 'ignoramus'?"

"I do."

"What is it?"

"A stranger like yourself."—London Tit-Bits.

Good Roads in Tennessee.

Over \$50,000 has been expended for macadam roads, granolithic pavements and curbing in Johnson City, Tenn., during the past year.

Huge Task.

It was a huge task, to undertake the cure of such a bad case of kidney disease, as that of C. F. Collier of Cherokee, Ia., but Electric Bitters did it. He writes: "My kidneys were so far gone, I could not sit on a chair without a cushion; and suffering from dreadful backache, headache, and depression. In Electric Bitters, however, I found a cure, and by them was restored to perfect health. I recommend this great tonic medicine to all with weak kidneys, liver or stomach. Guaranteed by all druggists; price 50c. B.

Three Physicians treated him without success.

W. L. Yancy, Paducah, y. I., writes: "I had a severe case of kidney disease and three of the best physicians in Kentucky treated me without success. I then took Foley's Kidney Cure. The first bottle gave immediate relief, and three bottles cured me permanently. I gladly recommend this wonderful remedy." Sold by G. R. Wiley. F

Pacific Coast Tour.

Chance of a Lifetime—Don't Miss It—Speak Quick.

The personally conducted excursion, the Pacific Coast to start July 5th bids fair to be an unequalled success. Bookings are nearly all in, and the details are being arranged for one of the finest personally conducted tours ever starting from the New England states. Every arrangement in connection with these tours has been to the end that the one hundred and twenty-five people who all themselves of the opportunity of seeing it may enjoy the pleasantest tour of their lives.

The route, which starts from Maine over the Maine Central through the White Mountains, is from start to finish one of the most attractive on the American continent; the rates are the lowest named from the Atlantic to the Pacific, and the details looking to the convenience and pleasure of the members of the party have had the most careful consideration. Any who anticipate joining the July 5th party, should make reservations at once, as the details must be worked within the next few days.

A second party will start on Aug. 28. Bookings for this one are coming in rapidly and any desiring to secure accommodations must apply soon.

Each party will be personally conducted by E. C. Bowler of Bethel, Me., from whom full information may be obtained.

PARKER'S HAIR BALM
Cleanses and beautifies the hair. Promotes a luxuriant growth. Never fails to restore color and vitality to the youthful crown. Cures scalp diseases. Hair falling out. 50c and \$1.00 at Druggists.

WERE HIS SECRETARIES.

Mr. Everts Got His Visitors Admitted.

During the last days of Oliver Wendell Holmes's life he visited Washington in company with Robert C. Winthrop and both of the venerable men attended the Senate chamber on the occasion of some ceremonies which crowded the galleries with people, so that they were unable to obtain seats. They sent their cards to Mr. Everts, hoping that he might arrange a place for them, and when he met them in the marble room he explained the difficulty.

The galleries are crowded, as you know," he said, "and the rules of the Senate admit to the floor of the chamber only members of the two houses of Congress, members of the Cabinet, ex-officio persons who have received thanks of Congress, and private secretaries to Senators. I cannot get admission in any other capacity, but you will accept highly respectable remuneration as my private secretaries. I will find you on the floor. Both the poet and statesman accept, and Mr. Everts took them to the door, where he addressed the doorkeeper as follows:

"My dear sir, these two young men are my private secretaries. You will give them the best of the gallery, but I am trying to have them seated with me and overlook their duties. I wish you would take a look at them so that when they come here again to see me you will find them," and with that he pushed the swinging doors and motioned Mr. Holmes and Mr. Winthrop to enter, while the doorkeeper, in a bearded sort of way, remarked in an undertone:

"Well I'll be blanked!"—Chicago Herald.

Marvelous Surgery.
An Long, a Kingsland tailor, owes his life to a marvelous feat in surgery. Two months or more ago he was taken to the London Hospital with a wound in the chest. He had been wounded, an examination showed his heart had been penetrated. Doctors decided that the only chance of saving the patient was to take up the wound in the heart, and delicate task was performed by Richard Warren after the wound in the chest had been enlarged. For some time Long was in a serious condition, but Tuesday he was able to appear in the Worshipful street Police Court to port a charge of attempted murder, and against Jacob Blitt, 35, stick man, who was committed for trial.

A Death-Feigning Plant.
At certain insects, birds, mammals and reptiles habitually pretend to be when danger threatens them is a well known fact but it is generally believed that this stratagem is resorted to by animals. In South America, however, there is a plant—a species of mimosa—which resorts to feigning, evidently for the purpose of preventing grass-eating animals from eating it. In its natural state the plant has a vivid green hue; but when it is touched by a human finger or by any living animal it collapses into a tangle of apparently dead and withered stems.—London

The Citric Cure.
The citric acid is admittedly a fine and stimulant, its purest form, juice, is in universal favor. Weary, bilious women are taking a citric cure with splendid results.

Cure A Cold In One Day.

Grace M. Stuart is at home from Boston.

The commencement exercises of the Paris High school will be held this week. Rev. I. W. Chesboro preached the baccalaureate sermon. The choir consisted of Mrs. Ethel Noyes, soprano; Mrs. Lou Doughty, alto; Mr. George Cutting, tenor; Mr. Albert Dean, bass. The class were marshaled to the seats by Louis Clark. Mrs. Agnes Penfold played the march. The graduation will be held Thursday evening in the Baptist church. The members of the class are:

Alberta G. Andrews, Howard Maxim Helen L. Chapman, Ray A. Chapman Vera D. Foster, Bernard Twitcheil Vida E. Jenne, Donald Briggs Sara I. Swett, Morton Bolster Bessie Mason, Grover Brown Grace Penfold, Winslow Burbank Isabel C. Morton, Harold Cole Ada M. Thayer, Edward Shaw Eva Muirhead, Ralph Penfold Blanche Barrows, Merton Merrill Ethel Crockett, Charles Merrill Flora Murch, Albert Littlehale Josephine Cole, John Lindley Lewis Keen.

Asthma Sufferers Should Know This.

Foley's Honey and Tar has cured many cases of asthma that were considered hopeless. Mrs. Adolph Buesing, 701 West Third St., Davenport, Iowa, writes: "A severe cold contracted twelve years ago was neglected until it finally grew into asthma. The best medical skill available could not give me more than temporary relief. Foley's Honey and Tar was recommended and one fifty cent bottle entirely cured me of asthma which had been growing on me for twelve years, and if I had taken it at the start I would have been saved years of suffering." Sold by G. R. Wiley.

NEWRY.

Mrs. Lucretia Bartlett is spending a few days with her sister, Mrs. A. H. Powers.

Fred Bailey gave a dance and social last Saturday evening, at Ramsdell's hall with quite a large attendance.

Dr. Kittredge of Farmington, was in the place, last Thursday, doing some dentist work.

Mrs. A. W. Powers remains about the same.

Don Smith and family went to North West Bethel, last Sunday, to visit his mother.

Ask Your Dealer for Allen's Foot-Ease.

A powder for the feet. It cures Swollen, Sore, Hot, Callous, Aching, Sweating Feet, Corns, and Bunions. At all Druggists and shoe stores, 25c. Ask, to-day.

EAST BETHEL.

Mrs. Mary Winslow of Lowell, Mass., is visiting her sister, Mrs. H. E. Bartlett.

Mr. and Mrs. M. E. Bartlett are spending a few weeks with relatives in Waltham, Mass.

Mr. A. H. Bartlett of South Framingham, Mass., is spending a few weeks vacation at his home here.

Mrs. F. B. Howe and son John are spending a few weeks at Songo Pond with Mr. Howe. They occupy the cottage of Mr. T. F. Hastings.

Mr. Z. W. Bartlett recently had the misfortune to lose a very valuable three-year-old colt. It got entangled in a woven wire fence and was found dead in the pasture.

Mrs. Lizzie C. Bartlett accompanied by her sister, Mrs. Mary F. Winslow of Lowell Mass., is attending the graduating exercises of Gorham Normal School, this week, her daughter, Miss Amy Bartlett, being one of the graduates; they will also visit at South Windham.

RIGHT TIME TO CURE CATARRH

G. R. Wiley Guarantees Hyomei Will Cure if Used Now.

The early summer when the weather becomes warm and settled, is the best time of the whole year to treat catarrhal troubles with the expectation of complete and lasting relief.

Everyone who has catarrh, or even a tendency to catarrh, should use Hyomei now, for the benefit will be gained twice as quickly and the disease thoroughly eradicated from the system.

The complete Hyomei outfit costs but one dollar, and includes a neat pocket inhaler, a medicine dropper, and sufficient Hyomei for several weeks' treatment. The inhaler lasts a lifetime, and if more Hyomei is needed, extra bottles can be obtained for 50 cents.

In Bethel there are scores of well-known people who have been cured of catarrh by Hyomei. If it does not cure you, G. R. Wiley will return your money. This is the strongest evidence he can offer as to his faith in the remedy.

NORTH NEWRY.

Miss Lois Bennett of Wilson's Mills is visiting Mrs. F. P. Flint.

Mr. D. W. Kilgore and Leon Widber were in Waterford last week.

Mrs. Mary Littlehale has returned from Andover where she has been visiting her grandchildren.

The Ladies' Aid will hold a mid-summer fair at Kilgore Hall Saturday evening June 24, when they will dispose of their friendship and album quilt. Ice cream will be served.

Thrown from a Wagon.

Mr. George K. Babcock was thrown from his wagon and severely bruised. He applied Chamberlain's Pain Balm freely and says it is the best liniment he ever used. Mr. Babcock is a well-known citizen of North Plain, Conn. There is nothing equal to Pain Balm for sprains and bruises. It will effect a cure in one-third the time required by any other treatment.

For sale by G. R. Wiley, Bethel; H. W. Dennison, West Bethel; E. L. Tebbets, Locke Mills; J. W. Bennett, Gilead.

NORTH ALBANY.

Miss Katie Foster of Lynn, Mass., and Charles Wells of North Bridgeton visited at C. P. Pingree's last week.

Charles Haskell was in this place last Sunday.

Lelia Kimball is at home visiting her brothers and sisters this summer.

Eustace Bennett was home from Lewiston a few days last week.

Ed Mason and wife were at North Waterford last Saturday.

The telephone poles are nearly all set on the main line from Bethel through Albany to Waterford.

Geo Dean Pingree is at home through vacation.

F. H. Bennett has been getting out cedar poles for the telephone line.

The people of this section have been mending highways. Ed Rolfe and Neil Brown are running the road machine.

BEES AND BEE KEEPING

"GIANT BEES" OF INDIA.

Imported into This Country for the First Time—Very Ferocious.

Various races of the honey-getting bees will be kept by the Government at Washington for experimental purposes, among them one or more colonies of the so-called "giant bees" of India, which specially and for the first time will be imported into this country.

These giant bees, one species of which is found in the Philippines, are much larger than the little honey-gatherers to which we are accustomed. They are plentiful in India, and though they have never been domesticated, enormous quantities of their combs are collected, chiefly for wax, which is an article of considerable export from that country. One may see tons of it stored in warehouses at Calcutta and other seaports.

These are forest bees, dwelling in wild woods. They do not live in hives, but suspend their huge combs from limbs of lofty trees. The natives are exceedingly afraid of them, telling incredible tales of their ferocity, and even narrating instances where swarms of the insects have attacked villages and killed many people. Nevertheless, for the sake of gain, professional bee-hunters are engaged regularly in the occupation of robbing the honey-makers of their stored sweets.

The bee-hunter in India wears no clothing except a breech-cloth, and lacking a bee-veil or other protection, he uses stratagem. Having located a comb, he climbs the tree—or perhaps it is a lofty ledge of rock from which the comb hangs—and holds a long stick with a bunch of ignited leaves

on the end of it in such a way that the smoke will drive out the bees. The latter rise in a cloud into the air above the comb, while the robber cuts it away and lowers it to the ground gently with the help of a rope.

Notwithstanding the supposed ferocity of these giant bees, there is no doubt that they can be handled easily and safely by persons who understand the business. How far they may be susceptible of domestication remains to be ascertained, but in any event, if introduced in our semi-tropical forests, they would furnish considerable crops of the finest and most valuable wax. The drones, or males, strange to say, are no larger than ordinary bees, and it is likely that they would mate with the females of species already acclimated here, producing new and useful varieties.

One important reason why it is desired to introduce these bees from India is that they have much longer tongues than our bees, and so could get honey from many kinds of flowers which, like redclover, have corolla tubes so deep that most of their sweets are beyond the reach of the species now domesticated in the United States. If this nectar, which now goes to waste, can be gathered by the imported insects, it is so much clear gain. The subject is one in which all bee-keepers, whose industry is one of great importance in this country, have good reason to be keenly interested.

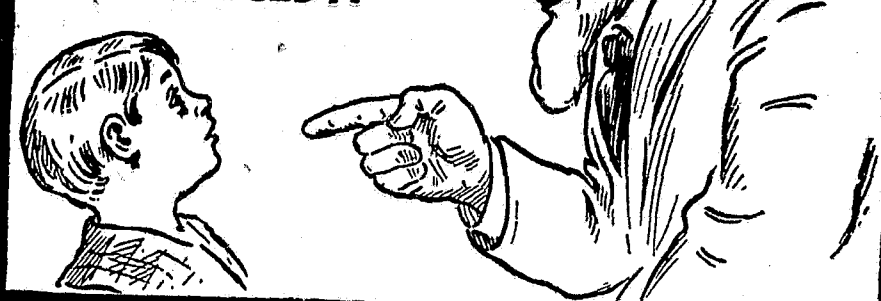

The apiary on the Arlington Farm will be a breeding station for various races of bees. Queen bees of Caucasian, Cyprian, Dalmatian, Italian and Carniolan races will be specially imported for propagating purposes, with a view to the improvement of varieties. Within the last few years science has taken up the business of improving the honey bee, particularly in respect to its capacity for honey-gathering, though also in relation to gentleness of temper (an important point to the bee-keeper), and bees of various stocks have been brought from abroad and crossed with those on this side of the water.

It is a curious fact, not widely realized perhaps, that there were no bees in America until the seventeenth century, when they were brought from Germany. These first importations were of the common, black variety, now found all over the United States, which are so fierce as to be difficult to handle and control. At the present time beekeepers select their bees carefully as farmers do cattle, each stock having its special merits. The Cyprians (from the island of Cyprus) are wonderful honey-getters, but somewhat irritable. The Italian bees are exceedingly docile and prolific.—Sunday Magazine.

Spraying for both insect enemies and fungous diseases is a part of the fruit business. If care does not intend to post himself on how to combat these foes, he would better not attempt fruit growing.—Farmer's Voice.

THE AMERICAN MONTHLY REVIEW OF REVIEWS

The more Magazines there are, the more Indispensable is The Review of Reviews

"Indispensable." "The one magazine I feel I must take." "The world under a field-glass." "An education in public affairs and current literature."—these are some of the phrases one hears from noted people who read the Review of Reviews. The more magazines there are, the more necessary is the Review of Reviews, because it brings together the best that is in all the most important monthlies of the world. Such is the flood of periodical literature that nowadays people say that the only way to keep up with it is to read the Review of Reviews. Entirely over and above this reviewing section, it has more original matter and illustrations than most magazines, and the most timely and important articles printed in any monthly.

Probably the most useful section of all is Dr. Albert Shaw's illustrated "Progress of the World," where public events and issues are authoritatively and lucidly explained in every issue. Many a subscriber writes, "This department alone is worth more than the price of the magazine." The unique cartoon department, depicting current history in caricature, is another favorite. The Review of Reviews covers five continents, and yet is American, first and foremost.

Men in public life, the members of Congress, professional men, and the great captains of industry who must keep "up with the times," intelligent men and women all over America, have decided that it is "indispensable."

THE REVIEW OF REVIEWS COMPANY
13 Astor Place, New York

BERLIN, N. H.

Mr. and Mrs. Dapley and daughter left for Old Orchard, last week, to remain for the summer.

Mr. and Mrs. Jos Shields of Quebec are spending their honeymoon in town.

Mrs. Nellie Britton of Boston, is visiting in the city.

Carl O. Balch and Lowell J. Reed have returned home from the University of Maine.

Rev. W. P. Ladd, former rector of St. Barnabas is in the city.

The contract for the building of the new I. O. O. F. block has been awarded to Stewart & Snodgrass, contractors, and the plans were drawn by the architect, Chas. B. Gifford. The block will be erected on the corner of Pleasant and Mason streets and will cover an area of 43x83 feet. The work has already begun.

The graduating exercises of the High school were held last Wednesday evening in the Congregational church before a large and appreciative audience. Much credit is due both pupils and teachers for the high order of the exercises.

CENTRAL MASSACHUSETTS

And the Hoosac Country and Deerfield Valley.

Massachusetts boasts of a shore section which is known not only throughout the United States but throughout the civilized world. The North Shore of Massachusetts contains such famous resorts as Marblehead, Swampscott, Salem, Beverly, Clifton, Devereux, Manchester-by-the-sea, Rockport, Montserrat and Gloucester; but this is not all, rather but a small portion of the vacation grounds of the Bay State. Central Massachusetts, a delightful region, is noted for its healthful climate. In fact, such towns as Jefferson, Rutland, Barre, etc., are recognized by the medical profession as among the most healthful resorts in the country, especially for persons suffering from any pulmonary affection. The hotel accommodations are excellent and because of its proximity to the city, it is a favorite region for business men desiring summer homes.

The Deerfield Valley and that portion of Western Massachusetts among the Hoosac Mountains are regions where landscape beauty and delicious atmosphere are the attributes. Persons desiring full information concerning the resorts of Massachusetts should send a two-cent stamp to the General Passenger Department, Boston & Maine Railroad, Boston, for the beautiful illustrated booklet entitled "Central Massachusetts" and two cents also for the other booklet entitled "The Hoosac Country & Deerfield Valley."

The Descending Scale.

When a girl is first engaged she figures on a ten room house in the swell part of town. As time goes on the house gradually decreases in size until it is a four room structure. Then all the fancy trimmings are left off, and next the house is located in a remote part of town. Finally when the wedding comes off it is announced that the couple will reside with the bride's father.—*Atlantic Globe.*

Rome wasn't built in a day. Don't expect profits from advertising before the ink is dry.

The Mistakes of Your Life.

Do not number among the mistakes of your life—that of neglecting to procure a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. Some of your family may be suddenly attacked with cramp, colic or diarrhoea, which are always prevalent during the warm weather, and immediate relief is necessary. This is the most reliable medicine in use and can always be depended upon, even in the most severe and dangerous cases. Get it to-day. It may save a life.

Sold by G. R. Wiley, Bethel; H. W. Dennison, West Bethel; E. L. Tabbets, Locke Mills; J. W. Bennett, Gilead.

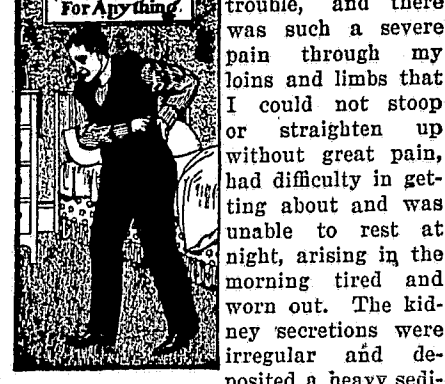

Kodol Dyspepsia Cure
Digests what you eat.

REACH THE SPOT.

To cure an aching back,
The pains of rheumatism,
The tired-out feelings,
You must reach the spot—get at the cause.

In most cases 'tis the kidneys,
Doan's Kidney Pills are for the kidneys.

Charles Bierbach, stone contractor, living at 2625 Chestnut St., Erie, Pa., says: "For two years I had kidney trouble, and there was such a severe pain through my loins and limbs that I could not stoop or straighten up without great pain, had difficulty in getting about and was unable to rest at night, arising in the morning tired and worn out. The kidney secretions were irregular and deposited a heavy sediment. Doctors treated me for rheumatism, but failed to help me. I lost all confidence in medicine, but Doan's Kidney Pills relieved me so quickly and so thoroughly that I gladly made a statement to that effect for publication. This was in 1898, and during the six years which have elapsed I have never known Doan's Kidney Pills to fail."

A FREE TRIAL of this great kidney medicine which cured Mr. Bierbach will be mailed on application to any part of the United States. Address: Foster-McBurn Co., Buffalo, N. Y. For sale by all druggists; price, 50 cents per box.

GLADSTONE AND DOROTHY.

Her Literal Translation of the Bible Saved the Day.

This is the season when good housewives have trouble with the servants who cannot get up. But I doubt if it ever occurs to them, as it did to Miss Dorothy Drew when she was not more than seven, that the Scriptures emphasize the vanity of early rising, says the "Tattler." Dorothy positively refused to get up, and her grandfather, Mr. Gladstone, had to be called to overawe the rebel.

"Why don't you get up, Dorothy?" he asked.

"Because the Bible doesn't approve of early rising, grandfather," was the unexpected reply.

"Really, Dorothy," said the astonished statesman, "you must be mistaken."

"Oh, no, I'm not," she persisted; "here is it," and she turned up the second verse of the 127th Psalm: "It is vain for you to rise up early." The old parliamentarian had nothing more to say. The argument floored him.

Spontaneous Irish Wit.
American travelers in Ireland make a point of extracting spontaneous Irish wit, and often are rewarded.

Cyrus W. Field, of Atlantic cable fame, once stopped a peasant to make inquiries about Blarney Castle. Receiving the information, he gave the Irishman the following conundrum:

"Now, Mike, suppose that Lucifer was sure of us both; which would he take first, do you think?"

The Irishman looked thoughtfully for a moment, then said: "Yer honor, I think he'd take me."

"Why," asked Field.

"Because he's always sure of you."

On another occasion a well known American writer for young people, upon landing at Queenstown, was on the alert to hear an Irish bull or some witty remark. She took an express train to Dublin direct, which did not stop at any other station on the way.

Several persons mistook the train and rose to get off when nearing one of the way stations.

"Keep your seats!" roared the conductor. "Keep your seats! This train never stops at all."

In the Wrong Department.

A prominent physician tells this story at the expense of the modern craze for specialism in the medical profession: A poor woman from the East Side of New York went to a nearby dispensary to ask aid for her little son, who had one of his fingers smashed with a baseball bat. At the first room where she applied she was told by a curt attendant that the boy could not be treated there.

"Wrong place," he explained; "this is the eye and ear department."

"Where is the thumb and finger department?" inquired the woman, simply.—*Harper's Weekly.*

The Little Woman's Retort.

The mild-business man was calmly reading his paper in the crowded trolley car. In front of him stood a little woman hanging by a strap. Her arm was being slowly torn out of her body, her eyes were flashing at him, but she constrained herself to silence.

Finally, after he had endured it for twenty minutes, he touched her arm and said:

"Madame, you are standing on my foot."

"Oh, am I," she savagely retorted. "I thought it was a valise."—*Kansas City Independent.*

Not Equal to the Occasion.

"We're awfully glad you can be here to dinner with us, Uncle Thomas. What's the matter?"

"I guess I better wait for the second table, Mary. You see, I never eat with two knives and forks and three or four spoons to wunst before, and I'm afraid I might spill things."—*Chicago Record Herald.*

John P. Harrington.

It is with pleasure the readers of the News learn of the success of the sons and daughters who have left Bethel and won distinction and honor, and the following extracts from the Manila Times will be read with interest as they will show the recognition of one who has won honors in his work both here and in Manila also his opinion of the "new citizen"—the Philipinos.

"Mr. John P. Harrington, son of the late Patrick Harrington was born in Bethel in 1869. After leaving the district school he went to Boston and graduated from the Massachusetts Institute of Technology in the architectural course and soon secured the position of superintendent of Norcross Brothers Co., and remained in their employ seven years during which period he superintended construction of works aggregating in value six million dollars. Some of the more important being the American Optical Company factory, Southbridge, Mass., Clark University building, Worcester; the Worcester Consolidated Railroad Office buildings and car barns; the Conservatory of the Natural Food Co., Niagara Falls; Allegheny County Court House, Pittsburg, Pa., Buhl Chapel, Sharon, Pa.; Perkins' Memorial, Concord, N. H., Clark Gardens, Promflet, Nt.; Colgate Mansion, Bennington, Vt.; Heights Monument Boston, and the Boston Terminal Station.

Mr. Harrington is superintendent for W. R. White Co., New York, and went to Manila April 1904, as superintendent of construction of the new street railway and "has in this brief space of time brought an immense task to completion. He is regarded by the other officers as little short of a genius and has a truly phenomenal capacity for work. He is quick to bring order out of confusion and his services have been of infinite value to his employers."

Mr. Harrington says much in praise of the Philipinos: "I have never experienced more uniform success with any class of workmen than with Philipino laborers. The work itself stands as a monument to what the native Philipino can accomplish if intelligently handled. The organization which we have perfected is composed of reliable workmen whose service has been marked by fidelity and efficiency. Tardiness and absence from work have been extremely rare, the men only insisting on being allowed Saturday afternoon and Sunday. In all lines of work the native was able to give intelligent service and in the iron work displayed unusual intelligence. Eighteen days after the first pile was driven for the car house foundation the steel framework of that structure was completed. On the dizzy heights of the scaffolding, they showed no fear. The stack of the power house is 182 feet high, and was completed in twenty-six days, a working day being nine hours, I could not desire better work than these men accomplished."

Mr. Harrington shows the possibilities open to any young man who has the one purpose of his life, to do his best believing success will reward earnest effort, and the friends of his native town extend hearty congratulations.

Smoking in a Powder Magazine

Is courting death more suddenly but not more surely than neglected kidney disorders. Foley's Kidney Cure will cure a slight disorder in a few days and its continued use will cure the most obstinate cases. It has cured many people of Bright's disease and diabetes who were thought to be incurable. If you have kidney or bladder trouble, commence taking Foley's Kidney Cure to-day, before it is too late. Sold by G. R. Wiley.

F.

A man at St. Louis recently thought that he would become an amateur farmer, so set to work.

When spring came romping along he set forth for the fields with his trusty hoe and began work. His faithful dog got in the way and the hoe removed its tail. Now the man has gone back to a business career, as he thinks farming too dangerous.

FOR SALE

Farm for Sale.

The attention of anyone desiring to purchase an excellent intervalle farm is called to the B. W. Kimball farm at Middle Intervale. The farm consists of 150 acres, will cut 40 tons of hay and will pasture 15 head of cattle. Large quantity of wood and lumber, 200 young apple trees, 20 plum and cherry trees. Buildings in good repair. Excellent land to handle and under good state of cultivation. Situated within 3 1/2 miles of Bethel village on R. F. D. route. Local telephone connection. Inquire of

E. C. BOWLER,
Bethel, Me.

FOR SALE.

The Ryerson Place in Bethel.

Fine Country Place in Mayville, near Bethel. About 135 acres, 35 tillage, 100 pasture, wood and timber. Cuts a good lot of hay. In good cultivation. Large two-story house with spacious ell and shed connected, 25 rooms; 2 large barns, 40x100 and 30x75. Water in house and barn. All in excellent repair. House has been used as hotel by owners, but was built for private house. Has been much improved lately. Location is unexcelled for health, business, home life, or summer resort. Situated in the bend of the river, with fine view of the mountains; fronted by broad level intervals, backed by fine forests; first class community.

Upon the farm is the trotting course of the Riverside Park Association which with all buildings goes with the farm. One of the most attractive and desirable places in the State. Excellent for summer boarders. Owner sells because the recent death of her son renders her unable to manage place. Price, \$10,000 on easy terms. Apply to

HERRICK & PARK,
Bethel, Me.

Farm for Sale.

A nice farm situated in Lewis town within three miles of the city, on electric road; fifty acres of land, about equally divided as to pasture and tillage land; has thirty or forty fruit trees; a spring of pure water near house, also nice well water, excellent set of farm buildings including large hen-house, new; cellar under house, ell and stable; excellent land to cultivate, and cuts twenty-five tons of hay; early land, and excellent markets for vegetables, berries and all farm produce; never failing brook runs through the pasture. Will sell at a bargain and on easy terms. For particulars inquire of, or address,

LET HIM ALONE.

Don't try to open the other man's eyes;

Never insist upon guiding his feet;

Always be careful just how you advise;

That is the part of a person discreet.

He may be careless and you may be neat,

You a hard worker and he a mere drone;

None of us, though, is entirely complete,

If the man's satisfied let him alone.

Though you consider his diet unwise,

Wonder and grieve at the things that he'll eat,

You may discover with pain and surprise

What is your poison may be to him meat.

He may be cold when you're feeling the heat.

Hot he may be when you're cold as a stone,

Bitter to you his taste may be sweet—

If the man's satisfied let him alone.

If he's content with the bargain he buys

Why should you show him the thing is a cheat?

Let him believe these impossible lies,

Go on his way in his foolish conceit.

You can't protect all the lambskins that bleat

If you attend to affairs of your own.

What if he does take a flyer in wheat?

If the man's satisfied let him alone.

L'ENVOI.

Prince, my poor way you may easily beat,

Ways that are better are readily shown!

Yet you'll excuse if again I repeat:

If the man's satisfied let him alone.

THE HOME.

Keep a Goin'!

If you strike a thorn or rose,
Keep a goin'!
If it hails or if it snows,
Keep a goin'!
Tain't no use to sit and whine
When the fish ain't on your line;
Bait your hook and keep a tryin',
Keep a goin'!

—Frank L. Stanton.

In most every home you will see over the door the legend worked in letters of red: "What is Home without a Mother?"

Across the room is another brief design: "God Bless Our Home." Now what's the matter with "God Bless Our Dad?"

He gets up early, lights the fire, boils an egg, grabs a dinner pail and wipes off the dew of the dawn with his boots while many a mother is sleeping. He makes the weekly handout for the benefit of the grocer, milk-man, butcher and baker, and his little pile is badly worn before he has been home an hour. He stands off the bailiff and keeps the rent paid up. If Johnnie needs a new pair of boots "cause he is just walking on the ground," dad goes down in his hip pocket and comes up with the price of a hard day's sweat. If Mary needs a new ribbon for her back hair, mother yearns for a new wrapper, and the baby howls for a rattle, down goes dad again and comes up with the required coin.

But if he buys a new pipe for a quarter because the old one is getting "kinda" strong, he is warned that smoking is an expensive habit and that men have smoked up blocks and farms and happy homes. When show time arrives dad comes up with the price and ma goes out with the neighbors, and Flora sparks her beau in the parlor. Dad's clothes are none too good and grim with stick so he sits in the kitchen with the kids. If there's a noise during the night he is kicked in the back and made to go down stairs and find the burglar and kill him.

Mother darns the socks, yes she does, but dad bought the socks in the first place and the needles and yarn afterward. Mother does up the fruit. Well, dad bought it all and jars cost like the mischief. Dad buys chickens for the Sunday dinner, carves it himself and draws the neck from the ruins after every one else is served.

"What is Home Without a Mother?" Yes, that is all right. But what is home without a father? Ten to one it is a boarding house, father is under a slab, and the land-lady is the widow.

Dad, here's to you! You've got your good points and they'll miss you when you're gone.

The Father's Responsibility.

We deeply appreciate the untold and untellable value of the mother's influence in a true home where children are growing up and being trained for time and eternity. Too much cannot be said about the honor that is hers. Her responsibilities are enormous, her work is taxing, her influence incalculable and her reward eternity. But all this should not obscure the father's responsibility for the proper bringing up of the children. As a matter of fact it often does. Very many, we had almost said the majority of fathers excuse themselves from any important share in these great duties, on the ground that it is the mother's work, not theirs. They hardly know their own children. They hurry off to business in the morning after a hasty breakfast, and return at night tired and nervous, to become absorbed in their evening paper or to go out again in the evening to the club or some other engagement, and the children are left to others for amusement, instruction, companionship and counsel. In other instances, where a father here and there, does appreciate his responsibility and successfully meets it, exerting a wise and beneficent influence upon his offspring, becoming their comrade, imparting to them the touch of manliness, being in his God-appointed place, prophet, priest and king in his family, he is very likely to get scant credit for it, save

in his own conscience, from the children and from his God. People in general still attribute most of the honor of his children's turning out well to the mother's influence. The truth is that in an ideal family life the best can only come to the children through a perfect union of the masculine and the feminine in matters of nurture and training. Nowhere is ideal marriage more needed than here. The father's ways with the children should not be wholly his, nor the mother's hers; but together they should exert their blended influence, which is not his nor hers but theirs, and should equally share the rewards.—Education.

Don'ts for Husbands.

Don't forget that a woman likes love tokens as well after as before marriage.

Don't be unreasonably jealous. It belittles you in the eyes of your wife.

Don't think that you are the only man who works.

Don't raise your hat to lady friends and not to your wife, when you meet her in the street.

Don't leave your wife at home when you go out to enjoy yourself.

Don't compare your wife's household management with that of your mother. Remember that the latter had far more experience.

Don't sigh over what might have been, make the best of what is.

Don't kill the love of a devoted woman by so-called innocent flirtations.

Don't forget that your wife has right to a regular allowance which she can call her own.

Don't sneer at your wife's first failures. Rather should you show an appreciation of her efforts to please you.

Don't forget that your wife has a birthday. A small present accompanied by a kiss and a loving word, is quite as much appreciated as a costly gift.

Don't forget that your wife needs recreation at times, just as much as yourself.

Don't think that your wife can run the house on five dollars per week, while you keep quite as much for your own pocket.

Don't get out of temper if breakfast is a fraction of a minute late. An overclouded morning denotes a stormy day.

Don't interfere in household matters. That is your wife's department, and you know little or nothing about it.

Don't neglect to take an interest in your wife's dress, and above all, allow her sufficient money to dress according to your station.

Triumphs of Modern Surgery.

Wonderful things are done for the human body by surgery. Organs are taken out and scraped and polished and put back, or they may be removed entirely; bones are spliced; pipes take the place of diseased sections of veins; antiseptic dressings are applied to wounds, bruises, burns and like injuries before inflammation sets in, which causes them to heal without maturation and in one-third the time required by the old treatment. Chamberlain's Pain Balm acts on this same principle. It is an antiseptic and when applied to such injuries, causes them to heal very quickly. It also allays the pain and soreness. Keep a bottle of Pain Balm in your home and it will save you time and money, not to mention the inconvenience and suffering which such injuries entail.

For sale by G. R. Wiley, Bethel; H. W. Dennison, West Bethel; E. L. Tebbets, Locke Mills; J. W. Bennett, Gilead.

The Japanese officers in the field consider it a point of honor to avoid luxury. Gen. Nogi was given a beautiful cloak at one time and sold it at once, turning over the money to the Red Cross. He said that he had one cloak and that there were those in his army in need, so that he could not keep anything which was not an absolute necessity.

CASTORIA.

Bears the Signature of Dr. H. P. Plummer

Lydia E. Pinkham's Vegetable Compound

is a positive cure for all those painful ailments of women. It will entirely cure the worst forms of Female Complaints, all Ovarian troubles, Inflammation and Ulceration, Falling and Displacements of the Womb and consequent Spinal Weakness, and is peculiarly adapted to the Change of Life. Every time it will cure

Backache.

It has cured more cases of Leucorrhoea than any other remedy the world has ever known. It is almost infallible in such cases. It dissolves and expels Tumors from the Uterus in an early stage of development. That

Bearing-down Feeling, causing pain, weight and headache, is instantly relieved and permanently cured by its use. Under all circumstances it acts in harmony with the female system. It corrects

Irregularity,

Suppressed or Painful Menstruation, Weakness of the Stomach, Indigestion, Bloating, Flooding, Nervous Prostration, Headache, General Debility. Also

Dizziness, Faintness,

Extreme Lassitude, "don't-care" and "want-to-be-left-alone" feeling, excitability, irritability, nervousness, sleeplessness, flatulency, melancholy or the "blues," and backache. These are sure indications of Female Weakness, some derangement of the Uterus. For

Kidney Complaints

and Backache of either sex the Vegetable Compound is unequalled.

You can write Mrs. Pinkham about yourself in strictest confidence.

LYDIA E. PINKHAM MED. CO., LYNN, MASS.

COURTLY ACQUAINTANCE

Told By The Lady Just Returned From Abroad.

The lady who had just returned from abroad was relating some anecdotes of Germany.

"My friend and I were in the park at Naumburg," she said, "listening to the morning concert. Presently a tall and distinguished-looking German with much urbanity asked us if he might occupy part of our bench, which accommodated four.

"After he had been seated a few minutes he pointed out a local beauty which started a very agreeable conversation. This was interrupted by the appearance of a stout woman, who signified her intention of occupying the remaining space on the bench. Immediately our suave German's manners deserted him—he spread himself out—he told the woman that she could not sit with us—that it would make it too crowded and warm and that she must find a seat elsewhere.

"We were amazed and tried to compensate for his rudeness by assuring the woman that there was room and that she was welcome. But she did not need our assistance. In vociferous tones she assured the man that she meant to sit there, and she punctuated her remarks by shoving him aside and squeezing herself in. Then she settled down to the noisy enjoyment of a bag of cherries.

"After some groaning and reiterated complaints that it was too warm and crowded, the man resumed his manners and conversation with us.

"One of my stock questions is, where in Germany is the language spoken most purely?" I asked our acquaintance, and he held exciting consultation with the stout woman. She suggested Berlin, and he insisted upon Hanover. A wordy battle ensued. Both talked at once, contradicted each other loudly and gesticulated violently.

"Then the woman left and the man expressed relief in a deep sigh, and gave me one big, broad wink. He again picked up his politeness and said he was sorry that he was leaving the next day, as he would enjoy being with us again. I asked him if he was alone in Naumburg and he replied, in a surprised way: 'Why, no, that lady who was just here is my wife.'"—Detroit Free Press.

Treatment of Pear Blight.

Professor Waite, the pear blight expert of the department of agriculture tells that certain definite results have been secured in the investigation of this disease, which if they could be availed of by fruit growers would reduce ravages of this blight. The disease, however, is now understood to be transmitted from one tree to another and from one orchard to another by insects; it is not done by winds as was formerly believed. Surrounding unaffected trees can be saved, if the affected ones can be deprived of their transmitting power, the same as a smallpox case can be quarantined, and the community rendered safe. The difficulty lies, in pear blight, in the fact that an entire neighborhood, once affected at different points, must be treated en masse. If a man has an isolated orchard he will have no trouble in controlling the disease.

After the severe cutting back necessary when it is found that a tree has the blight, Mr. Waite says that the most important thing is the antiseptic painting of the cut surfaces.

TAYLOR'S BUTTER MAKING.

Inexpensive Means of Separating Rapidly Fatty Portion of Sweet Cream.

The watery portion is absorbed by heavy sheets of blotting paper supported upon absorbent material like Turkish toweling, says Committee of Franklin Inst. The watery constituents pass readily through the blotting paper and are taken up by the absorbent pads, while the fatty portion forms a layer on the surface and may be removed, and salted and worked like ordinary churned butter. It is stated that patents have been granted in the United States, Canada, England, France, and Germany for this process. The committee reports that an analysis of this fatty layer showed 79.49 per cent of fat and 2.55 per cent of casein, and that the fatty layer is very palatable when fresh but does not keep well unless salted and worked.

An analysis of the salted and worked butter showed 82.95 per cent of fat and 1.15 per cent of casein.

Congestion of Udders.

In free-milking cows it is not uncommon for the udders to become congested at the beginning of the lactation period. If all the milk is not removed, the udder will then become inflamed. When this occurs the gland will secrete but little milk and this is the cause of many caked and swollen udders. The treatment is mainly preventive. When a calf does not take all the mother's milk, the udder should be emptied by milking at least once a day until the calf is two weeks old. When the cows can not be handled, relieving the udder by milking can not be practiced. A common custom in this country is to put two calves with one cow. In simple inflammation of the udder, rubbing the inflamed parts with camphorated ointment is all the treatment necessary.

New Method of Making Butter.

Instead of using water for washing butter, the author used separator skim milk which had been twice pasteurized. Salted and unsalted samples prepared in this manner contained, respectively, 11.35 and 12.14 per cent of water, the former containing only 1.5 as many bacteria. The author considers that the results are sufficiently interesting to warrant his calling the attention of butter makers who have a poor water supply to this simple method of overcoming the difficulty, and states that the experiments are being repeated at the British Dairy Institute.—J. J. Lloyd.

Foaming of Milk in Skimmer. The results of experiments made by the author show that foaming of the milk is caused mainly by small amounts of casein dissolved by the lactic acid and by the milk sugar in the milk.

Between 30 and 50 degrees C., at least, foaming increases with increasing temperatures. Milk containing similar amounts of total solids, milk sugar, and nitrogenous substances may give different amounts of foam in separating, according to the interval that has elapsed since milking and the care with which the milk has been handled.—F. W. Woll.

White Carrots as Fodder. J. H. Mahon in Agricultural Report says: In an experiment reported, 4 cows were kept on natural pasture for a period of 8 days, after which they were fed a daily allowance of about 35 lbs. of carrots per head for a second period of 8 days, following which they were fed almost exclusively on carrots (60 to 75 lbs. per head daily) for a third period of 8 days. As an additional ration to natural pasturage, the carrots increased the yield of milk, but when the cows were fed almost exclusively on carrots and deprived of pasturage, the yield was diminished.

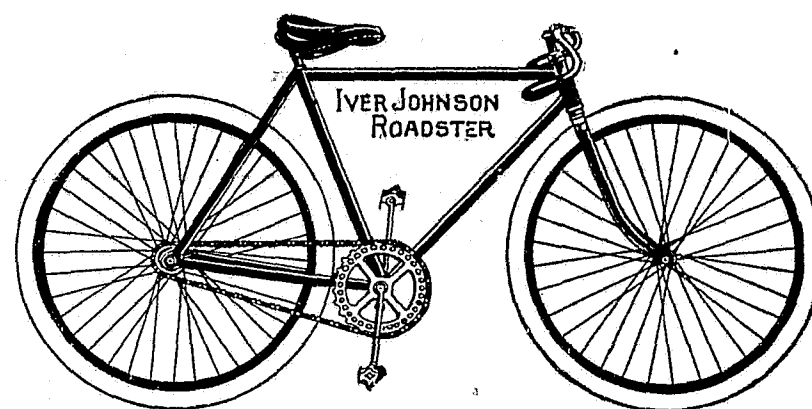

Ripening Cream. No part of the buttermaking is of more importance than the ripening of the cream. In winter it is frequently attended with considerable difficulty, as few farm houses are provided with conveniences for maintaining even temperature, says Hoard's Dairyman. Where there are several fresh cows in the herd cream ripens better, with less danger of introducing harmful bacteria. Fresh buttermilk in such cases usually furnishes a starter sufficient for all practical purposes. Save out a couple of quarts each time and stir this thoroughly the cream twenty-four hours before churning.

Building Up the Dairy Herd. From the first crop of calves from common cows retain the heifers from the best cows or, better still, keep all the heifers, says Holstein-Friesian Register. When these heifers are fifteen to eighteen months old, breed them to their sire. Inbreeding to this extent may be safely followed under any circumstances. When these heifers drop their calves give them special care. Remember that you will be disappointed if the majority of them do not develop into better cows than their dams.

Milk of Well Fed Cows. Examinations were made of the milk produced by 99 cows in 11 different dairies. The results obtained by the author do not indicate that cows fed best during the winter give the richest milk, but rather that they give an even and regular flow of milk of a more uniform fat content than is the case with cows fed poorly during the winter months.—F. W. Woll.

No Need to Walk.

The Bicycle is one of the cheapest means of travel on the highway that there is to-day, to say nothing of the healthful and invigorating exercise it affords and the convenience of a wheel.

PORTLAND, MAINE.

LIVE STOCK

COWS AND WATER THEY DRINK.

Young Cows Require Large Quantities of Water When Dry Fed.

Ordinarily the small cow drinks from 6 to 8 gallons of water in 24 hours, and the large cow drinks from 7 to 9 gallons. There is no fixed measure, as no two cows, even of the same breed, or of the same weight, or on the same rations of the same feed, and yielding, practically the same quantity of milk of the same quality, will drink exactly the same quantity of water.

I have one small cow that seems to be satisfied with 5 gallons of water a day, while another one of her weight takes 7 gallons. A neighbor has a large Holstein-Friesian cow that drinks over 10 gallons a day, and another quite as large that takes only 8½ gallons.

My experience is that the younger cows require more water, and that there is a decrease each year in the water taken as the cows grow older. In some cases even this does not hold good. A cow out of sorts will drink more or less as she is chilly or feverish.

Indigestion, pasturage, changes in ration, irregularity in feeding and milking, and the amount of exercise are factors that influence the drinking of the milk cow. The character of the food has much influence. Dry food calls for more water. Succulent food carries its own water largely. The cow on pasture needs less and drinks less water than the cow on dry feed.

In providing a supply of water for a herd, it is well to furnish the water and let the cows measure their drink for themselves. Then they will get the proper amount at the proper time. Running water and individual drinking vessels in the stalls will solve the problem of water and drinking perfectly.—J. L. Van Doren, in Ex.

Feeding Dish Water to Pigs.

It is a common practice to save the dish water as slop for pigs but as this often contains washing soda hogs fed on such slop are always out of whack and often sicken and die. The symptoms and course of the disease appear much like cholera. Diarrhoea, vomiting, fever, lameness, partial paralysis, nervous disturbance and death frequently occur. The course of the disease from a few hours to several days, apparently depending upon the amount of alkali ingested at one time. Death occurs in the majority of cases. Upon post mortem examination, the lymphatic glands along the bowels are found swollen and dark colored. The mucous membrane lining the intestines is pale and shiny. Other internal organs are also involved. The treatment is wholly preventive and consists in avoiding the feeding of slops containing these alkalis.—Field and Farm.

Successful Vinegar Making.

The New York Agricultural Experiment station at Geneva was asked to ascertain the causes of poor quality, and to outline the methods of securing good vinegar. It is found that, properly done, there should be no difficulty in making vinegar containing the required 4.5 per cent of acid from York State apples; and by careful control of conditions the time of making may be considerably shortened. If the cider is not properly made and handled, however, the vinegar may easily fall below the standard, through failure to reach the required acidity, or through deterioration after the acid has been formed. Only sound, ripe apples should be used, avoiding dirty fruit or washing it before pressing. Use only juice from the best pressing, place in clean barrels which have been treated with hot water or steam to destroy undesirable germs. The barrels should not be full, nor tightly corked, as free access of air is desirable. In ordinary cellar fermentation the first stage, the alcoholic fermentation, should be complete in five or six months; but by storing in warmer rooms, and by the use of yeast the time can be much shortened. The second stage, the acetic fermentation, may be hastened by heat and by use of a good "starter" or "mother" or sharp vinegar. When the required acidity is reached the barrel should be filled to the bung and corked tightly to avoid undesirable fermentations.

Local Irritation.
Itching, which induces a horse to rub the legs together, stamp on the stable floor and otherwise exhibit signs of impatience, should lead to a careful search for possible causes of local irritation. Animal or vegetable parasites may locate themselves on the skin of the extremities and remain under the close covering of hair without being detected. Get rid of the irritation by the free use of soap and hot water, followed by a two per cent solution of carbolic acid.

Some claim that skim milk and corn make a balanced ration. Whether this is so or not—one thing is true: If hens are given skim milk they get more protein than they can get from corn alone.

We believe skim milk fed to laying hens when eggs are twenty-five cents per dozen will pay a better dividend than if fed to pigs when live hogs are four cents per pound. What do our readers think or know about it?

School of Life Assurance Instruction

Opens July 5th, 1905

Progressive and enterprising men wanted to become Life Assurance Salesmen.
You may be thoroughly educated and trained in our School of Instruction by men who know how. Tuition free. Write for full particulars.

FRANKLIN H. HAZELTON,
93 Exchange St., Portland, Me.

THE CASE OF SUSIE ADAMS.

Betty Proved Her Aptness to Repeat Quotations.

Betty is seven years old, dearly loves her school and teacher, and when at home talks extensively of the matters of her classroom.

"Lots of the boys and girls hate 'quotations,' but I like it awfully," she volunteered once.

"And what do you mean by 'quotations'?" asked an inquisitive elder.

"Why, don't you know? It's something teacher writes on the black-board, and you learn it, and it helps you all the week, and then the teacher asks you for it, and on Friday you go to the platform and say it."

"Oh! Well, make believe this is Friday, and do it for us now."

Quite charmed, Betty rose, mounted an imaginary platform, gripped her little dress, gave a serious curtsy, and said, with loud and elocutionary distinctness, "Susie Adam forgets Susie Adam."

"What if she does? Let her. Give us the quotation."

"That's the quotation."

"Good gracious! Say it again."

"Susie Adam forgets Susie Adam," repeated Betty, worked up and threatening to become war-like.

Neither questioning nor expostulation availed against this statement concerning Susie, and not until the teacher herself was interviewed did the mystery resolve itself into "Enthusiasm begets enthusiasm."—Woman's Home Companion.

Georgia Candidate Read Palms.
Georgians at the capital were telling an enthusiastic story about a progressive candidate for judge down there, and how this same candidate won votes during a house to house canvass.

"Let me look at your hand," this candidate would say to a voter. "Ah, I see the letter 'M.' You will notice that I have the same sign in my hand. If I am elected and you come to me just show that sign in your hand. Then I shall know that you are my friend."

Every voter thus addressed felt flattered, and the candidate thereby gained great strength. The ruse was practiced in a mountain section of the state, where it did not occur to the inhabitants that every man had a letter "M" outlined in the palm of his hand.—Washington Post.

The Hindoo Idea of Wit.

An English lady reformer of uncertain age who came here to deliver a lecture told the audience that she would be happy to answer any question, upon which a fat baboo came to the front with "How old are you?" "Oh, no," she replied. "I don't mean questions of that sort; only ones connected with the subject of the lecture." "Are you 40?" continued the baboo, nowise abashed. "No, I won't answer such a question," was the reply. "Are you 50?" continued her tormentor. "Oh, no; I told you I won't answer such questions." "Are you 60?" "Oh, no, no, no; I'm not 60;" the lady responded precipitately.

Fine Opening For a Young Man.
"Yes," said Mrs. Malone, to the old friend who was picking up the threads of family history, "my Bobby, he's traveling with a circus now."

"Pretty hard work, isn't it?" inquired the interested caller.

"Never a bit of it," returned the proud mother of Bobby. "He's living a gentleman, he is—hands in his pockets, as ye might say—for it's a handsome salary he gets, and every blessed thing he has to do is to lay his head in the lion's mouth a matter of some two or three times a day or thereabouts!"—Youth's Companion.

Why He Moved.
"I don't say that Indiana is 'not a pretty good state to live in,'" said the man who has lately moved over the line into Michigan, "but several things happened one after another to discourage me. The last one was a cyclone."

"Did you have your buildings swept away?" was asked.

"No. The wind was pretty well petered out when it reached my place and dropped a span of horses at my door. Those horses had come along over thirty miles."

"And do you mean that they were alive?"

"Certainly I was in great need of a span of horses just at that time and looked upon it as a godsend, but alas, I was doomed to disappointment."

"But how?"

"Why, the durned cyclone that had picked 'em up had forgotten to pick up a set of harness at the same time and the animals were simply a burden on my hands."

Sufficient Reason.

Mrs. Strap—Charlie, what makes you swear so dreadfully while you are shaving?

Mr. Strap—I suppose, my dear, it is because of the old nick in the razor.

FARM AND GARDEN

CULTIVATING STRAWBERRIES.

Preparing the Ground and Planting.

If the soil is lacking in humus, a crop of cowpeas plowed under would be beneficial to the land, says Farmers Voice. When you can not do this, stable manure plowed under will do. Do not harrow but let land lay rough until spring. As soon as the land will work nicely, replot and work thoroughly with a harrow and smooth down with a drag or roller. By subsoiling, you increase the depth of your soil and storing capacity for moisture.

By deepening your soil, it will be easier worked, and will not suffer so from excessive moisture or drought, to say nothing of the universal benefit to the crop.

It is advisable to plant as early in the spring as possible, for early set plants will grow off better and the loss of plants will be little or none.

I have better results from planting on firm soil than that which is very loose. I also find that the later in the spring the plants are set the better condition the ground should be in and the firmer the surface should be.

After the ground is thus prepared, we mark it off both ways. The rows the wide way, should be four feet apart and the distance the narrow way, depends on the variety grown.

The best marker we have ever used, and we have tried several, is made by bolting a pair of straight shafts to a piece of timber 2x4 inches and 12 feet long, and brace it well. We bore holes in the piece every 4, 2, and 1½ feet. These holes are in a slightly slanting way. In every four-foot hole we bolt a square iron rod about three feet long, sharpened at the lower end. Then when horse is hitched to shafts you have a device something like a rake, only the teeth slant back.

Pruning the Apple.

In pruning a fruit-bearing plant like the apple attention must be given not only to the height and formation of the head, but to the removal of wood as well. The apple bears its fruit on spurs which are themselves developed from wood one year or more of age. For that reason, therefore, the removal of wood which carries fruit spurs reduces the crop the tree is capable of bearing. This then, is a practicable way of thinning the fruit. Besides accomplishing this result pruning can be used to lessen the annual growth and force the energy of the plant which would naturally be used in making wood into the fruit, thus increasing its size or enabling the tree to carry a larger quantity than would be possible were a normal wood growth permitted.

Advantage of a Soil Shelter.

When the garden is depended upon for food supplies for the table or for pure income in the case of marketing a week gained in earliness of crops counts for just so much, says Field and Farm. An easy way of gaining a little advance for earliness—especially with vegetables requiring heat, such as beans, cucumbers and that class—is to build a soil shelter. This consists merely of drawing up a ridge of earth to the north or windward side of the row, as protection on the one hand from raw wind and on the other to catch the sun's heat. The row can be thrown up with a small plow, care being taken not to have the soil fall over and cover the seed too deeply.

Planting Early Peas.

The smooth peas of the Alaska class are best adapted for early garden planting. They should be sown as soon as the ground thaws out sufficiently for working. The wrinkled sorts are more tender but their excellent qualities make them desirable for later planting. A small amount of moisture is required by peas and if the soil is in fair condition when planted they should not require irrigation before the pods have formed. Irrigation at this time cools the ground and for this class of vegetables should be avoided if possible. Peas should be sown very thickly in the rows as the vines will thus hold themselves up, make better growth, shade the ground and are more easily harvested.—Field and Farm.

Milking by Electricity.

A report referring briefly to a newly invented electrical apparatus claimed to be more effective than milking by hand and also to insure absolute cleanliness.

BLUE STORES

Don't forget that the Nation's greatest holiday

FOURTH OF JULY

Will be here before you know it. You'll want to be dressed in a cool, summery fashion, for you'll certainly enjoy the day better if you are rightly dressed for it. One of our stylish Two-Piece Suits would be just the thing. No Suit looks better,—no Suit wears better,—no Suit is so "in place" in any place. If you want solid comfort, try one.

ALL THE FIXINS

In Soft Shirts, Wash Ties, Belts, Straw Hats, Thin Underwear, etc., to complete your comfort. Clothes cleaned, pressed, repaired and dyed.
